Jagenberg Group at the K 2022 trade fair Synergies for comprehensive Industrial Solutions

Krefeld, October 19, 2022. With eight companies, the Krefeld-based Jagenberg Group will be demonstrating comprehensive Industrial Solutions expertise at the K trade fair in Düsseldorf. From Oct. 19-26, 2022, the Group invites you to its joint booth A92 in Hall 3 of the world's most important trade show for the plastics and rubber industry. There, the companies will showcase their high-performance and innovative machines for processing and finishing of web-shaped materials as well as numerous affiliated services for the value chain. With the "Digital Customer Solutions" area, they are also looking into the digitally networked future, supporting the circular economy and sustainability with innovative products.

Mechanical engineering of the future: Holistic thinking - detailed solutions

Even the framework of the trade fair presentation makes clear what makes the Jagenberg Group uniquely strong: a team of companies, a scope of services that leaves no desires to be unfulfilled, and the common will to shape the future on this basis. By integrating specialized, renowned companies, the Group offers a comprehensive range of services for producers and finishers of web-shaped materials all over the world, such as coating, printing as well as slitting and winding. This mechanical engineering of the future includes the full range of necessary services: from the planning and development of individual solutions to lifecycle services that accompany the entire service life of the machines.

Solutions for the production of a new generation

The companies of the Jagenberg Group are also presenting a novelty with the Digital Customer Solutions area: the digital integrative platform the@vanced and the customer portal my@vanced integrate the processing of web-shaped materials into a digital ecosystem. In this way, the Jagenberg Group is opening up completely new possibilities for the use of its machines in terms of efficiency, productivity and reliability, and is providing access to the possibilities of more sustainable production. In addition, the systems form a remote service that allows access, for example to slitting and winding machines, via a highly secure IP connection and expand the potential of individual and networked machines.

K trade show at Messe Düsseldorf

From October 19 to 26, Messe Duesseldorf will be the center of the global plastics and rubber industry. The joint stand of Jagenberg Group creates an ideal presentation area for the group and its companies. The central theme of the booth, is the synergies of bundled services that the Group's global companies offer their customers. To this end, the Jagenberg Group is bringing together suppliers from the cutting and winding, decor, automation, security services and digital solutions sectors.
